

Eye Cyber Insurance

Fast, easy and comprehensive

Eye Cyber Insurance, sold exclusively through our European-wide broker network is combined with our powerful, yet easy to implement, cyber security solution. It's the last piece in the puzzle to help you feel in total control of your cyber risk. So in the event of a cyber incident, recovery costs and loss of income are covered.

The challenge

- 1 Cyber incident costs are underestimated**

Cyber incidents can threaten the existence of your business. Recovery costs are normally underestimated by a factor of 10.
- 2 Help can take time to arrive**

A quick response with an experienced team will mitigate the potential (financial) impact of an incident. Finding an incident response team during an incident takes time you can't afford.
- 3 Business stops. Customers move on**

Production grinds to a halt, goods cannot be delivered and your customers resort to contingency measures. All of this means lost revenue and expense.
- 4 Collateral damage**

Incidents can extend beyond your organisation. For example, third parties can also be harmed, or claim to have been harmed, and hold you liable.

The solution

In the event of an incident, Eye Cyber Insurance will provide professional support and protect you against often costly – sometimes unaffordable – repercussions of a cyber attack. As with any insurance policy, it's important to ensure you are comfortable with what's covered and get advice from your broker.

80% Less questions asked

8-10 minutes to apply

€1bn turnover covered

Getting started

1

Step 1: Get to know our security solution.

Our insurance solution is only offered in combination with our security solution. With our protection in place, we can offer you wide coverage and a competitive premium. Go to [eye.security/demo](#) to arrange an appointment.

2

Step 2: Apply for cyber insurance

You can apply for an obligation-free insurance proposal either directly or through your broker. However you do it, ensure you seek advice from your risk advisor. Visit [eye.security/solutions/cyber-insurance](#) to apply

3

Step 3: Quote in days

After an 8-12-minute online application process, we send you a quote back in days, not weeks. Your risk advisor will advise you on the best-fit insurance for your risk appetite.

Why businesses choose our combined security and insurance solution
